

A MLII polarity and torso placement

Front view: patient's right is on the left of the drawing.

B One channel per input; channel identities differ

Normal autoencoder: NSRDB

First stored channel: ECG1
Anatomical placement is unspecified.
Used to learn a normal ECG reference.

Supervised models: MITDB

Select MLII by its header name.
Record 114: MLII is the second channel.
Exclude 102 and 104: neither has MLII.
